Our Projects & CSI

In addition to our core services, we have initiated a WhatsApp channel, implemented a CSI initiative, and supported an already established external NPO, across different sectors and industries.

OpIndie Books (CSI Initiative)

A local semi-remote library where patrons can loan books online and collect the physical copies at a designated location. The initiative will launch with 100 books—we are currently at 95—and the project will commence as soon as all the necessary structures are in place.

Op-portunities

A WhatsApp channel brought to you by OpIndie Solutions—or rather, a project of OpIndie Solutions—where we have dedicated our time and resources to finding vetted opportunities for the youth in business, those seeking educational opportunities, and even job openings. The initiative currently has 250+ beneficiaries and has already made a tangible local impact.

PECOP (Support Partnership)

We have partnered as an optimization partner with the Personal Concept Project (PECOP), a well-established NPO that has been operating since 1997 and remains one of the oldest local structures. Our support includes optimizing their website, facilitating the effective management of their social platforms, developing core resources, and providing digital marketing support—extended as part of our commitment to fostering meaningful partnerships and driving community impact.
